

HPURE AUTOTRONIC DCTF

Product Description

Fully Synthetic Dual Clutch Transmission fluid (DCTF) specifically engineered for use in conventional DCTs and certain hybrid DCTs. Its advanced formulation, incorporating carefully selected premium synthetic base stocks and the latest additive technology, enhances heat transfer, material compatibility, and excellent performance for anti-copper corrosion to ensure applications in the valve body and hybrid vehicle. The product ensures seamless e-motor compatibility while delivering outstanding DCTF performance.

In addition, it provides superior transmission durability, exceptional oxidation stability, and long-lasting frictional performance for extended, shudder-free operation. With excellent pump efficiency, as well as anti-wear compatibility, this formulation represents the optimum choice for most modern conventional vehicles.

This product is suitable for use in Volkswagen/Audi, Ford, Mitsubishi, PSA and Chrysler 6-speed wet Dual Clutch Transmissions and 7-speed wet Dual Clutch Transmissions from BMW, VW, Geely and Great Wall.

Applications / Benefits

- γ Provides excellent oxidation resistance for use in strict environments
- γ Superior wear protection for critical transmission components
- γ Improved friction performance
- γ Thermal stability for longer life

Typical Characteristics

Test Description	Method	Unit	
Density @ 15 °C	ASTM D 4052	kg/L	0.848
Flash Point	ASTM D 92	°C	195
Pour Point	ASTM D 97	°C	-45
Kinematic Viscosity @ 40°C	ASTM D 445	cSt	32.2
Kinematic Viscosity @ 100°C	ASTM D 445	cSt	7.1
Viscosity Index	ASTM D 2270	-	190
